By the arrival of the Georgia from Chagres, we have dates from Valparaiso to the 24th of October The news is unimportant. We clip the fol-lowing paragraph from The Vulparaiso Neighbor of the 44th: cuil hearly all found bayers from 5.5.5.5.4, using a same improvement.

COFFEE—The quantity offered at public sale has been confined to 250 casks, 400 bags plantation Ceylon, 300 bags Costa Rica, and 250 bags Java, nearly the whole of which having been held for former prices was taken in. Of native Ceylon not more than 1,600 bags have changed hands, the last price being 52s 6d. A cargo of 2,960 bags good first Rico, bound for Trieste, bas been sold floating at 49s. In the neighboring continental ports the influence of the massified state of pointies has been greatly fit, and transctions have been restricted to small retail purchases for pressing wants for which rather lower prices have been recopist.

COFFER—Large sales of Russian have been made at 20s 49 ten, less 49 cent discount.

The rains this year have been unusually heavy and late in the season. At the South great distress has prevailed. On the Biobio the water rose and carried away dwellings. It burst its banks also, and so overflowed the country, that boats were able to come up to Concepcion from Talcahana. It is said in Valdivia to have rained steadily for twenty-six days in succession.

hana. It is said in Valdivia to have rained steadily for twenty-six days in succession.

Mr. Allen Campbell, civil engineer, who is superintending the construction of the Railroad from the port of Copingo, has visited this Province, for the purpose of examining the country between Valparaiso and Santiago, in reference to the construction of a Railroad. He started on the 14th inst., to go up the valley of the Concon river, to learn if that route be sufficiently practicable to warrant a survey.

The Hamburg bark Steinwaerder was spoken off Cape Horn, (date not given.) She had lost her foremast, bowsprit and rudder. This vessel sailed May 27th, from Cuxhaven, with emigrants for Valdivia, and cargo for Valparaiso. They are Germans; and, it is to be feared, had a great amount of suffering to endure. It appears remarkable that a vessel spoken in such a distressed condition should have been left.

unsuccessful, viz: E. S. Whelen & Co...

The bids, it will be seen, are from very respectable parties, and from all parts of the country .petitors, and those who were unsuccessful will probably be in the market as purchasers. The bonds of this Road are a favorite investment, and we see no good reason that they should not take rank with our best local bonds. Their convertible quality is worth 5 \$\mathbb{P}\$ ct. certainly. After the biddings were announced, sales were made at 931

The advices from Europe are commercially favorable but not very important. Cotton and Breadstuffs were firm and in fair demand. In American stocks there was not much doing. Barings' Circular says: The business in American stocks the last week has been limited, but quotations are without change. The sales have been confined to United States 6 P cent inscriptions of 1867 at 107 @ 107 1. Canada 6s in more demand at $102\frac{1}{2}$ @103.—Consols were $96\frac{1}{6}$ @97, about previous quotations. Money was 24 a 21 P ct. The demand for silver continued for the Continent.

The Georgia and Empire City have probably brought two and a half millions of dollars of gold dust, in the angregate, in the hands of passengers and in freight, the latter vessel having sixteen hundred thousand on her manifest. This is fully equal to our expectations, and must give the com-mercial world confidence in the continuance of the present abundance of money. The amount of gold exported from San Francisco from the 12th Nov. 1849 to 30th Oct. 1850, according to the Custom House books, is \$21,890,388. The Placer Times estimates the amount of gold taken out of districts of the Feather, Yuha, Bear and Ameri can Rivers, for the last five months, at \$30,240,000, and thinks this is two thirds of the whole amount mined in California in that period.
